Columns

PK	Name	Type	Not Null	Unique	Len	Prec	Scale	Init	Notes
	cagridId	Integer			0	0	0		One or more characters used to identify, name, or characterize the nature, properties, or contents of a thing.
	annotationVersion	double			0	0	0		It captures a numerical, using a double value, version of an annotation.
	codeValue	String			0	0	0		Identifier for a concept in a coded vocabulary. Unique within a given vocabulary.
	codeMeaning	String			0	0	0		The human understandable meaning of the coded value.
	codingSchemeDesignator	String			0	0	0		The designator of the vocabulary from which the term was selected.
	codingSchemeVersion	String			0	0	0		Identifies the version of the coding scheme used.
	authorizedBy	String			0	0	0		It is used to identify authorization update of the annotation.

AnatomicEntityCharacteristic

Database: , Package: AIM

Detail: Created on 1/3/2009. Last modified on 7/28/2009.

Notes:

Columns

PK	Name	Type	Not Null	Unique	Len	Prec	Scale	Init	Notes
	cagridId	Integer			0	0	0		One or more characters used to identify, name, or characterize the nature, properties, or contents of a thing.
	codeValue	String			0	0	0		codeValue represents the identifier of the particular term in a coded vocabulary. Should be unique within a given coding scheme.
	codeMeaning	String			0	0	0		The human understandable meaning of the term as determined by the coding scheme.
	codingSchemeDesignator	String			0	0	0		The designator of the vocabulary from which the term was selected.
	codingSchemeVersion	String			0	0	0		The version of the coding scheme used.
	annotatorConfidence	Double			0	0	0		A real number, between 0 and 1, indicating annotator's confidence that a characteristic is present.
	label	String			0	0	0		A human readable description of the anatomic entity characteristic.

ImagingObservation

Database: C++, *Package*: AIM
 Detail: Created on 5/6/2007. Last modified on 12/18/2007.
 Notes:

Columns

PK	Name	Type	Not Null	Unique	Len	Prec	Scale	Init	Notes
	cagridId	Integer			0	0	0		One or more characters used to identify, name, or characterize the nature,

								properties, or contents of a thing.
	codeValue	String			0	0	0	The code of the term in the native vocabulary.
	codeMeaning	String			0	0	0	The human understandable meaning of the coded value.
	codingSchemeDesignator	String			0	0	0	The designator of the vocabulary from which the term was selected.
	codingSchemeVersion	String			0	0	0	Identifies the version of the coding scheme used.
	comment	String			0	0	0	Free text comment
	annotatorConfidence	Double			0	0	0	A real number, between 0 and 1, indicating annotator's confidence that a characteristic is present.
	isPresent	boolean			0	0	0	A boolean value indicates whether or not an imaging observation exist in observed image(s).
	label	String			0	0	0	A human readable description of the anatomic entity characteristic.

Constraints

Name	Type	Columns	Initial Code	Notes
GetCodeMeaning	«property get»			
SetCodeMeaning	«property set»	newVal		
GetCodingSchemeDesignator	«property get»			
SetCodingSchemeDesignator	«property set»	newVal		
GetCodeValue	«property get»			
SetCodeValue	«property set»	newVal		
GetComment	«property get»			Free text comment
SetComment	«property set»	newVal		Free text comment
GetConfidence	«property get»			
SetConfidence	«property set»	newVal		

Name	Type	Columns	Initial Code	Notes
GetCodingSchemeVersion	«property get»			
SetCodingSchemeVersion	«property set»	newVal		
GetImagingObservationCharacteristicCollection				
SetImagingObservationCharacteristicCollection		ImagingObservationCharacteristic		
GetAnnotatorConfidence	«property get»			
SetAnnotatorConfidence	«property set»	newVal		
IsIsPresent	«property get»			
SetIsPresent	«property set»	newVal		
GetLabel	«property get»			
SetLabel	«property set»	newVal
